GVF ORBIT LIFT PRUNING TOWERS

12', 16', 20', 25'

For over thirty years we have been improving, tweaking and re-designing our pruning tower to offer you the most dependable, safe and rugged product. This is why we and many others agree, the GVF Orbit Lift Pruning Tower is the best in the industry.

Presenting our re-designed operators platform that is roomier and more functional than ever!

- Ergonomical work space.
- Largest in the industry.
- Fully enclosed platform with padding around the edges.
- Roomy, 19" door opening.

Standard Features Include:

- Convenient flip-up hood
- Kubota 3 cyl. Diesel engine
- 4 mph travel speed
- Great torque, 55% grade ability
- Two individual 31 - 15.50 -15 wheel drives for greater maneuverability in any position.
- Ignition switch located in the operator's platform.
- Operators controls located in center for use by either hand.
- Single hand joystick for true proportional drive control in any direction.
- Pruner/Saw selector located next to joystick for one hand operation.
- 2-speed electric throttle control.
- Tool rack for pruner and saw with quick disconnects.
- Special pivoting wheel on the rear of the machine is key to maneuverability.
- Large 15 gallon external fuel tank for increased operation time.
- Rugged chassis design built for durability and stability.
- Heavy duty boom and leveling arm with only 3 hoses running to platform. Hoses are plumbed through steel tubing.
- Cutting edge load sensing hydraulic system provides better fuel economy, less heat and greater proportional control.
- Towing is easily accomplished by highway-speed disconnect hubs.
- Tow tongue is carried on machine at all times.
- Boom positioning that is convenient for transporting.

Options:

- 25' lift offers a hydraulic sliding axle that makes it easier for you to go quickly from working to transporting the lift.
- Available with a picking basket.
- Heating and cooling option for operator's platform.

Safety

We are proud to deliver to you the safest pruning tower in the industry.

Some safety features include:

- 2-speed operation with high only achieved with operator's platform fully lowered.
- An enable switch that must be stepped on for directional controls to be operational.
- Lift over-ride functions located at the engine controls.
- Secure, fully enclosed operator's platform.
- Weather proof owner's manual storage container located on chassis.

Optional hydraulic sliding axle for 25' lift.

All new flip up hood.
