GVF ROTO SPRAY ROTATING AIR HEAD KIT

Standard Features Include:

- 285° rotation for better air control.
- Four adjustable air outlets.
- Hydraulic rotate.
- Electric powered distance adjustment.
- Heavy duty construction.
- Options:
 - Electric spray valve.
 - Single nozzle kit.
 - Flipover nozzle kit.
- Can be made to fit most sprayers.

Unmatched Versatility & Dependability

The Roto Spray is designed to give you the performance you need for those hard to reach spraying jobs. 285° rotation lets you take advantage of the wind conditions at all times. A baffled airhead with four air outlets enables you to get even coverage throughout the spray pattern.

Maximize Your Coverage On:

Blueberries	Christmas Trees
Grapes	Nursery Stock
Strawberries	Young Orchard Trees
Row Crops	

*Designed to fit new and
used Rears sprayers.*
