MOTORIZED CART
SECTION**

A mobile work platform designed with the maintenance of trellised apples in mind.

- 84" outside width.
- Width adjustment - Can slide up to 102" wide.
- One worker can control the speed and steering at thier level. No need for a dedicated driver.
- Upper controls include shut-off switch, brake switch, steering and forward and reverse travel speeds.
- Allows up to three people per side at different working elevations.
- Maximum working platform height is 48" and minimum is 18".
- Platforms feature 4" toe kick, 39" railing and a mid-railing for safety.
- Rugged tube frame construction.
- Light and easy to maneuver.
- Built for easy maintenance.
- External fuel and oil tanks with screens in filler caps and drains in the bottom of the tanks.
- Fuel system has inline 10 micron filter to prevent contamination.
- Kawasaki 16.4 HP air cooled engine.
- Speed: 0 to 9 MPH
- If conversion to a picking cart is desired, adding the wings is completed simply with nuts & bolts. No cutting or welding or other adaptations are needed.

One worker can control the speed and steering at thier level.

Hydraulic System

These features come standard to provide you with years of use.

- Hydrostatic drive with closed loop axial piston pump mechanically controlled.
- Wheel motors - radial piston with integral park brake.
- Hydraulic filter
- Oil cooler
- Hot oil shuttle to keep closed loop cool and supplied with fresh oil.

Designed with ease of maintenance in mind.

- All pivot points are accessible for quick greasing.
- Steering system incorporates DX bushings and can be easily taken apart for maintenance.
